PROFESSIONAL SUMMARY

Senior Frontend Engineer with **7+ years** of experience designing and delivering scalable enterprise applications using React, TypeScript, Redux Toolkit, React Query, and modern frontend architecture. Proven track record working on high-impact platforms for **Cencora (AmerisourceBergen)**, **Google**, **DBS Bank**, and government sectors, consistently building systems that serve millions of users. Expert in frontend architecture, reusable component systems, performance optimization, and enterprise-scale UI development. Dedicated to leading frontend initiatives, fostering cross-functional collaboration, and delivering high-quality, maintainable software.

SKILLS

- **Languages:** TypeScript, JavaScript
- **Frontend:** React, Redux Toolkit, React Query, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js
- **Architecture:** Microfrontends, Design Systems, Component Architecture, Performance Optimization
- **Testing:** Jest, React Testing Library
- **Tools:** Vite, Webpack, Docker, Postman, Git, CI/CD, Jira

PROFESSIONAL EXPERIENCE

IBM India Pvt. Ltd. | Senior System Engineer (Frontend) | Feb 2022 – Present | Bangalore, India

- **Client: Cencora (AmerisourceBergen)** | Senior Frontend Engineer | Oct 2024 – Present
 - Developing scalable React and TypeScript solutions for the Cencora Connect Portal.
 - Designing reusable component systems and frontend architecture patterns to improve maintainability.
 - Collaborating with backend teams to deliver reliable enterprise applications.
- **Client: Google** | Lead Frontend Engineer | Dec 2023 – Oct 2024
 - Led a cross-functional team of 4–5 engineers to architect and develop Google’s Test Data Management (TDM) platform from the ground up.
 - Spearheaded the technical migration from React.js to Angular to optimize platform performance and alignment with internal ecosystem requirements.
 - Integrated proprietary Google technologies, including BOQ and Piper, to build scalable, high-impact enterprise solutions.
 - Streamlined development and deployment lifecycles by implementing robust CI/CD pipelines using Jenkins and Azure DevOps, ensuring high-quality, continuous delivery.
 - Achieved a 30% increase in platform responsiveness and a 50% reduction in UI defects through rigorous architectural improvements and standardized code quality practices.
- **Client: DBS Bank** | Senior React Developer | Feb 2022 – Dec 2023
 - Engineered microfrontend modules powering critical banking payments and account dashboards, successfully serving over 10 million users.

- Optimized dashboard performance by refining rendering patterns, resulting in significant improvements in load times and user experience.
- Developed and maintained a reusable TypeScript component library, which was adopted by multiple internal teams to accelerate development cycles.

Globals ITES Pvt. Ltd. | Senior Software Developer | Jun 2020 – Feb 2022 | Bangalore, India

- Developed a labor welfare platform for the Karnataka Building and Other Construction Workers Welfare Board, Government of Karnataka, using React and Redux.
- Built secure Android applications and monitoring dashboards for a defence project and received Best Developer of the Year 2020.
- Delivered an eKYC application supporting Aadhaar and biometric verification.

Adverscribe Ad Solutions Pvt. Ltd. | Associate Developer | Aug 2019 – Apr 2020 | Bangalore, India

- Built dashboards, booking flows, and reporting tools for over 15 projects across React, Android, and PHP ecosystems.

Early Career (2018 – 2020)

Worked across frontend, Android, and web development roles, delivering React-based applications, Android solutions, and enterprise dashboards for multiple organizations before joining Globals ITES in 2020.

KEY ACHIEVEMENTS

- Led frontend development for Google's Test Data Management platform.
- Improved platform responsiveness by 30%.
- Reduced UI defects by 50%.
- Built banking applications serving over 10 million users.
- Developed reusable component libraries adopted by multiple teams.
- Received Best Developer of the Year 2020.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering | Sir Padampat Singhanian University | 2013 – 2017

AWARDS AND RECOGNITION

- **Best Developer of the Year 2020:** Awarded for exceptional contributions to a confidential defence project involving secure communication systems.
- **International Industrial Training Selection – JK Cement Works, UAE (2017):** Selected as one of only 10 students from the university for an international industrial training program in Fujairah/Dubai, UAE. Received a Certificate of Appreciation for outstanding performance.
